Introduction

In the modern world, streaming service has become a new trend for many audiophiles to enjoy songs. Spotify is one of them and has been more and more popular. It offers two tiers, Spotify Free and Spotify Premium for users to listen to music on various devices via the app or Web Player.

But the 'Download' option is only available for Premium users who paid for \$9.99 every month. Based on this situation, there are more and more people who are wondering whether there is a way to download Spotify songs for free. After that, users can also play ad-free Spotify music on devices without an Internet connection.

If you are also eager to get a way to do that, congratulations, you are in the right place. This article will cover the best Spotify Music Downloader for you to download music from Spotify without Premium. Let me share my successful experience of how to do that.

Why Need to Download Music from Spotify without Premium

The reason why you can't download music from Spotify with Premium is simple and reasonable: Spotify has two plans, respectively Spotify Free and Premium. To get offline listening mode, you should update to its Premium subscription at \$9.99 every month so that Spotify can make money. But even for premium users, they also can't own the downloaded Spotify songs as they are saved on the cloud. You also can't locate them and play them offline outside of the Spotify app. There are many restrictions for paying users, let alone free users.

So why not download music from Spotify without Premium? By using this way to download Spotify songs, you can not only get local music offline but also no need to play them anywhere. What's more, it's totally free.
